

MEASURED PARAMETERS

DISINTEGRATION TIME

ADVANTAGES

- + Magnetic coupling of the testing baskets
- + Available with up to four independent measuring stations
- + Stainless steel housing

OPTIONS

- Testing basket B for tablets from Ø 18 mm

Simple & practical: the testing baskets are magnetically coupled

Special testing basket for large tablets

STANDARD DEVICE

DISI-M

Semi-automatic disintegration tester with LCD display and individual timer

The DISI-M tablet disintegration tester offers user-friendliness in a tried-and-tested design. Opt for the manual DISI-M disintegration tester as a cost-effective alternative to the automatic DISI-A model. The DISI-M fulfils all EP/USP requirements.

The testing baskets can be attached and removed quickly thanks to the magnetic coupling. A few quick steps is all it takes to dismantle the testing baskets ready for cleaning.

As each station is powered separately, you can examine up to four different products at the same time. The softstart function ensures that the testing basket is immersed in a controlled manner.

MODEL	Stations (pieces)	L x W x H (mm)	Weight (kg)
DISI-1M	1	340 x 250 x 750	20
DISI-2M	2	475 x 250 x 750	30
DISI-3M	3	610 x 250 x 750	40
DISI-4M	4	750 x 250 x 750	50

The DISI-M disintegration tester is available with a choice of 1 to 4 measurement stations
